

# Environmental Policy Statement

SD 59 R3 17.11.2009

As one of the UK's leading Geotechnical, Piling & Foundation Engineering Contractors, Van Elle are committed to implementing and maintaining an effective environmental management system throughout our Company to fulfil our responsibility to protect the environment. It is our policy to :

Comply with all relevant environmental legislation, as well as other environmental requirements to which we subscribe through the design and implementation of our policies and procedures.

Identify and assess the significant environmental impacts associated with our activities, operations, products and services and integrate recognised best practice into our business operations to protect the environment.

Actively minimise our use of resources and implement greater efficiency in all our activities.

Ensure any risks of polluting the environment are identified and adequately controlled.

Manage waste generated from our business operations according to the principles of reduction, reuse and recycling.

Ensure that all employees understand the significance of the environmental aspects and impacts of the company

Monitor our environmental performance and implement a programme for continuous Improvement.

Monitor and assess the progress of the management system by way of a periodic management review

Work together with our clients in improving environmental performance on site

We value the contribution that every member of staff can make in improving our resource efficiency to reduce both operating costs and environmental effects
