

Geotool GTR790 Rig

Window Sampling Rig

Operating Height	m	2.4
Operating Width	m	1.02
Transport Length	m	2.35
Transport Height	m	1.25
Transport Width	m	1.05
Weight	ton	1.31
Borehole Depth	m	15
Borehole Diameter	mm	120

Dynamic Sampling Rig capable of retrieving 120mm diameter samples within a plastic liner system up to a depth of 15m depending on ground conditions. Good quality samples are recovered enabling changes in soil strata to be identified. Capable of carrying out insitu testing (SPT 'N' Values) and also used for the installation of environmental monitoring wells.

Transported in a large van and operated by a 1 or 2 man crew dependant on the nature of the site and drilling requirements. Ideally suited for domestic and tight access sites due to its small size and maneuverability. Can also undertake Dynamic Probing to a depth of 15m and small diameter open auger drilling up to 12m.
