

Beretta T41

Hydraulic Drilling Rig

Operating Height	mm	2368 (+500x2)
Length	mm	2460
Width	mm	1800
Transport Height	mm	1900
Max Gradeability	%	55
Bearing Pressure	N/cm ²	25.2
Weight	Kg	2700

The T41 hydraulic drilling machine, though only small in size, features a rotary drill head with a torque of 620Kgm. It can be used for a whole range of purposes: micropiles, tie-rods, anchoring, test holes and drilling small water wells. These are the natural environments where the T41 operates best.
