

Junttan PM 16

Pile Driving Rig

Maximum Pile Length	m	18
Operating Height	mm	20,390
Operating Width	mm	4,000
Operating Weight	ton	35
Transport Width	mm	3,000
Transport Length	m	19.2
Bearing Pressure	MPa	-

The Junttan PM 16 is the most compact Junttan piling rig designed for pile driving where piles are lighter and shorter. The rig can be used for driving timber, concrete and different types of steel piles. The recommended hammer ram weight is from 3,000 to 4,000 kg and the maximum pile length is 18 meters (59 ft). The rig has proven productivity due to excellent mobility, easy and fast handling of piles and top pile driving performance with hydraulic hammers.

This compact and agile Junttan piling rig has the same proven features as the heavier Junttan machines. Its rugged design makes it a safe and reliable rig even in the most demanding working conditions. The self-erecting leader and many advanced technical features ensure that the rig is ready to work in just a few minutes. The expandable tracks and low centre of gravity make the rig exceptionally stable in different working situations. The horizontal movement of the leader ensures fast spotting of the pile. Because of the lightweight construction and compact size, the rig can be easily transported to a new working site.
