

Klemm KR709 Rig

Crawler Mounted Hydraulic Rotary Bored Piling Rig

Track Width	mm	500
Track Length	mm	2,700
Operating Weight	ton	11.8
Operating Height	mm	5,000
Operating Length	mm	5,400
Bearing Pressure	KN/m	42.87

The Klemm 709 delivers nearly 3.5 tonne-meters of torque which enables this powerful rig to install piles of up to 600mm in diameter into some of the stiffest soils.

We are capable of installing rock sockets with our 708 and 709 rigs into weak and moderately weak rock to give nominal working loads of up to 1,000kN in certain conditions.

The rigs are delivered on our specially design beavertail rigid wagons which means that not only can we access the most restricted pile positions, we can access via some very restricted roads and lanes as well.
