

## VE Bunny Drop Rig

Hydraulic Bottom Driven Piling Rig

Max Steel Cased Pile	mm	200
Operating Height	m	1.4-2.1
Operating Width	mm	700-1,000
Operating Weight	ton	0.5
Max Hammer Weight	Kg	750
Transport Height	mm	1,400
Bearing Pressure	MPa	-
Power Pack Width	mm	1,200
Power Pack Height	mm	1,000
Power Pack Weight	Kg	750

*These fully hydraulic, purpose built piling rigs are designed and built for the installation of Steel Cased Driven Piles, up to a maximum diameter of 200mm, driven by an internal drop weight, up to 400 Kg, suspended from the mast. The winch is driven by a hydraulic power pack that is towed behind the rig, but can be located up to 50m from the rig during pile installation. The retractable rubber tracks and raking mast ensure that the rig can be tracked through a standard doorway to a working area.*
