

Vermeer HL1800 Rig

Crawler Mounted Hydraulic Bottom Driven Piling Rig

Operating Height	m	2.2-6.0
Operating Width	mm	1100-1400
Operating Weight	ton	7.0
Max Hammer Weight	Kg	1800
Track Width	mm	300
Track Length	mm	2250
Bearing Pressure	KN/m	51.85

The first Vermeer HL-1800 delivered to the UK is the latest addition to the Van Elle Restricted Access Division fleet. The Dutch engineered rig can install bottom driven steel cased piles from 150mm to 400mm in diameter for Working loads up to 600kN (Factor of Safety 2.5).

The machine has an automatic drop mechanism controlled by a computer which means consistent drop heights and therefore improved quality control on site.
