

Company overview

Formed in 1984 and listed as a quoted company in 2016, Van Elle is the UK's largest and most diverse geotechnical and ground engineering contractor

Our Vision:

To be the leading, most trusted provider of
TOTAL FOUNDATION SOLUTIONS

Our Goals:

Developing trusted partnerships
Deploying the best people and assets
Perfect delivery of projects

Providing an integrated service across our core markets:

HOUSING

Integrated piling and foundation systems for national and regional housebuilders, retirement and multi-storey residential.

INFRASTRUCTURE

Specialist ground engineering services to the rail, highways, coastal and flooding, energy and utility sectors.

CONSTRUCTION

Full range of piling and ground improvement services to the commercial, industrial and residential sectors.

Supported by our values:

SAFETY

Always put health and safety first

INTEGRITY

No blame; open, honest and straightforward; delivering on our promises

TEAMWORK

A 'can-do' approach, working together to exceed customer expectations

EXCELLENCE

Keen to impress our customers, always do a great job and keep improving what we do

Unrivalled capability and technical expertise:

Total Foundation Solutions

Full end to end capability

Investigation - design - construction - test & monitor
25 specialist ground engineering techniques
Best value solutions to suit project requirements

Market Leading Capability

Publicly quoted Group

120 strong rig fleet

Over 500 directly employed, specialist workforce
1100 projects per annum

GROUND INVESTIGATION & TESTING

Cable percussion, window sampling, dynamic probing and rotary GI
Pile testing, noise & vibration monitoring

GROUND AND SLOPE STABILISATION

Drilling, bulk fill and compaction grouting
Soil nails and anchors

GROUND IMPROVEMENT

Vibro stone columns
Rigid inclusions
Track bed stabilisation

RETAINING STRUCTURES

Contiguous and secant piled walls
Sheet piling and kingpost walls

OPEN SITE PILING

Rotary bored piles; cased and support fluid, CFA and cased CFA
Driven precast, steel tube and H piles

RESTRICTED ACCESS & SPECIALIST PILING

Lorry mounted & restricted access tracked rigs
Drilled piles (various techniques)
ScrewFast helical and grip piles

RAIL ENGINEERING

GI, slope, embankment and track stabilisation
Comprehensive lineside piling techniques
UK's largest RRV piling fleet

MODULAR FOUNDATION SYSTEMS

Smartfoot precast ground beams
Smartbase precast pile caps & gravity pads
ScrewFast steel modular grillages

CONSTRUCTION TRAINING

7 classroom, modern training centre, accredited plant facility and rail test track
Management, H&S, plant and streetworks
NVQ's & apprenticeships

In-house logistics support

DEDICATED TRANSPORT FLEET

PRECAST MANUFACTURING

STEELWORK FABRICATION

- Members of the Federation of Piling Specialists (FPS) and the British Drilling Association (BDA)
- Network Rail Plant Operator Scheme (POS) provider and Principal Contractor
- FORS Silver accredited transport fleet
- Members of CHAS, Constructionline Gold, SSIP, SMAS, RISQS Building Confidence, Safemark and SafeContractor
- Supply Chain Sustainability School Gold Member
